### How to use THE SUPER IMPLODER

Fit it on directly onto your hose/water pipe feed. Flow direction is indicated, i.e. water comes into the nozzle first, and then enters into the magnetic array and out the other end, where there is also a thread for standard  $\frac{3}{4}$  inch and metric attachments

Normal tap pressure is used, however our super strong design can easily go up to 55 psi, for many commercial farming situations.

### Applications of THE IMPLODER

#### ON THE FARM

##### Seed Germination

To increase seed germination success- farmers can simply spray water with the imploder attached onto a hose. If there is access to a "water container" or water tank, simply fill the container / tank (overnight if you wish) with the imploded water, then re-run the water thru the imploder directly onto seedlings. Try to store in non- metal materials and away from strong magnetic fields. This is just an option, it is not necessary to recirculate the water or store it in any way. Apply it directly onto crops and seedlings

Obviously- running the imploded water thru a sprinkler system is very easy to do.

##### Field crops, Green House, Wineries, Hydroponics, Flower growers etc

Imploder creates faster growth rate and denser biomass, stronger disease resistant crops, all of which increases the bottom line profits.

### **Dairy farming, Cattle and Hens**

Improves vitality of grass, digestion and assimilation. Increases milk production and quality of meat. Creates healthier eggs and laying performance.

Other presumably less potent water treatments have claimed very significant increases in milk production. We are very pleased to ask dairy farmers to feed TheImploder water to their milking animals, because the solubility increase makes it easier to suspend the nutrients and butterfat in solution. It makes sense the animal can produce more milk with less biological effort.

### **Compost**

Improves vitality of the compost, helps microbes to be activated. Increases the breakdown of compost /manure and the binding of nitrogen.

### **Rejuvenation of wasteland**

Along with the use of "revitalize the soil products", the imploder can help rejuvenate wasteland and deserts. Refer to "Bloom the Desert" project on the "Other developments from the Fractal Field Company" page on our website

## **OTHER INDUSTRIES**

### **Bio Fuel –Ethanol production**

Because it creates quicker fermentation rates. It also enables the water to separate faster, which increases fuel production and 'turn around'

### **Golf courses, public gardens and landscaping**

Because it creates healthier and more radiant looking grass, plants and flowers

### **Industrial and Farm waste management**

Because it increases sedimentation rate it will make sewage treatment more effective and quicker. The separation of water from waste material filtration happens faster e.g. waste management from farms e.g. "run-offs".

### **Food Technology and health products development**

Because it creates more nutritionally rich dense foods. Subtle forces in products such as homeopathic will be stronger.

### **Aqua Technology –Fish Farms**

Makes fish water healthier and resistant to infections. Sludge is quickly broken down

### **Swimming pools.**

We have conducted tests where we ran imploder water for a while every day and noticed the water felt 'silkier' - like it was easier to move through it. Also magnetic water treatments commonly see reduction in scale on pipes and certain fungi and algae growth. Since our device is probably the most powerful (in terms of gauss densities alone- not to mention the corrected centripetal spin to absorb that spin densely-from the nozzle) - it is highly likely that we will see even more potent effects on pool and pond waters.

### **Ice and Snow making Technology**

Creates ice and snow quicker, which means you will use less energy, saving much \$\$\$.

## **RETAIL**

### **Flower shops**

Because wilting flowers can be re-vitalized. Flowers/plants watered with Imploded water will LAST LONGER, saving on wastage.

### **Health spa's and Natural Healing Clinics**

Because imploder water feels silkier, and has more 'life force' and 'healing properties'. Because of water de clustering, it hydrates the body better. It helps to 'alkalize' the body.

### **Fish/aquarium shops**

Makes fish tank water healthier and resistant to infections

## **DOMESTIC**

### **In the kitchen**

You can use it for domestic water consumption, as it re-energizes water and increases its ability to hydrate the body. It will reduce the build-up and effects of lime deposits. Obviously, more plumbing is required to do this. Please use a licensed plumber, as fitting into or under a sink can be tricky and should be done with the greatest care.

Note: it does not 'filter the water' of impurities such as chlorine etc. That would need to be done first with a RO filter. However, we are testing to confirm The Imploder increases the rate at which both solids and gaseous pollutants are segregated, sedimented and evaporated.

It tastes and feels like fresh spring water- at a fraction of the cost of bottled water. With The imploded drinking water, people are consistently saying that it tastes 'silkier' and they are able to tell the difference every time. This is probably because of the decreased molecular cluster size and related solubility increase. People have reported various health benefits (one Canadian user swears it helped his back problem).

Obviously we cannot claim health benefits until much more testing is done. It is up to the individual to experiment. Even things like returning hair color from grey, which have been reported with various water treatments, makes sense, because increased solubility means more mineral in hair and bones. There could be also benefits for arthritis sufferers.

### **In the living room/ office**

Makes fish tank water healthier and resistant to infections

Keeps your plants strong and healthy.

Place into a water atomizer spray, to refresh yourself.

Pre energize water before filling a humidifier, makes the effect stronger in the room. Use for intensive cleaning

### **In the bedroom**

Say no more!

However, we will: In Traditional Chinese Medicine, the water element controls the kidneys, reproduction organs, will power and libido. If the quality and hydration of water is stronger, your cells and organs receive more energy

### **In the shower**

Install onto your shower water line to have a re energized shower- and the water feels more 'silkier'. Or simply install the Imploder Shower Nozzle, sold separately

### **In the garden**

Increase production of the family's garden to save money, and grow healthier plants and flowers. Grow the biggest cabbages in the neighborhood

### **Well water**

It will reduce the effects of lime deposits and 'heavy water'

**ORDER ONE NOW!**

[www.TheImploder.com](http://www.TheImploder.com)

Independent trial results from Organic India. Dramatic increase of germination and growth in foreground, compare to other crops that did not receive the imploder water treatment

Which one had the imploder water ??

new "Super-  
**The Imploder**  
**Water Energizing**  
*for stronger and better crops!*

The New "Super-Imploder" from - TheImploder.com - more at - [www.fractalfield.com/implodernews](http://www.fractalfield.com/implodernews)  
 Release date May 1, 2011

All New truly PHASE CONJUGATE MAGNETS- much higher flux densities- all center focused.

With this increase in flux density and focus- the molecular effect will be orders of magnitude stronger.

Flux Density  
Directly in the Stream of Intense Spin

3/4" (also metric equivalent)  
Thread Adapter Included (not shown)

**The "Imploder" water treatment creates a measurable and validated effect on plant growth, seed germination and bio mass yields - resulting in stronger and better crops.**

# THE IMPLODER

Tap water (BLUE) Magnet Water (RED)

Entropy Avg. (magnetic water)= 1.43

Entropy Avg. (tap water)=2.66

Plant weight increase in response to phase conjugated water: over 300%

Laboratory comparison on plant weights - as seen above:

Subject: Weights on plants

Date: Thu, 23 Apr 2009 18:14:47 +0100

From: Sal Giandinoto

I weighed the plants and placed them in sealed plastic bags for shipment for more tests. The weights were:

Magnet Water Plant 12.864g

Tap Water Plant 3.925g

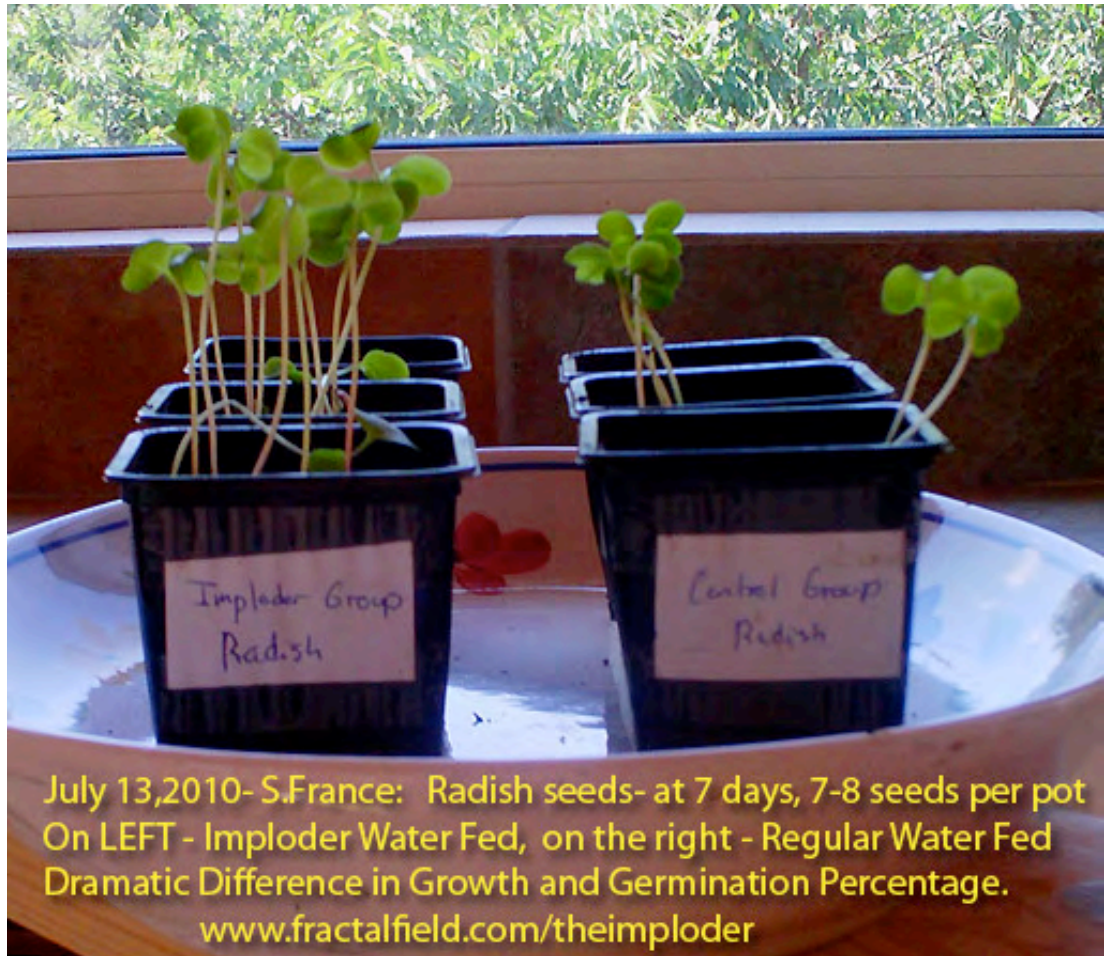

That is a yield ratio of 3.28 to 1. Quite impressive.

Sal

- Growth effect after 3 weeks:  
328 % Increase by weight measure.

## *Water Energizing*

*for stronger and better crops!*

Also available the "Tri Ploder"

The SuperImploder Water treatment Device

is the most powerful magnetic water treatment device in the world today. The published literature is overwhelming that strong magnetic treatment of water- is of benefit at many levels of agriculture.

The SuperImploder starts with 8 large surface area 3000 + gauss magnets- which are specially treated during the sintering process (while they crystallize)- with a frequency signature which is phase conjugate- meaning their flux lines produce the pine cone (compression / implosion).

In addition to the uniquely placed and polarized extreme magnetics- in the SuperImploder- we add an IMPLOSION NOZZLE. The vortex in this forttron super-plastic nozzle is precisely designed directly from Dan Winter's new equation which for the first time predicted the radii of hydrogen only by multiplying planck length times golden ratio exponents. Not only is this the Implosion geometry for net energy gain during collapse- which is the reason hydrogen exists (all golden ratio based)- it perfectly predicts in vortex angle for perfect implosion in water. This is why we call our nozzle "(Victor) Schauburger's Dream"!

Once the molecules of water have gained implosive centripetal force in their spin- at the molecular level- they then function like an armature entering a permanent magnet motor- as they enter the super strong magnetic fields. The result is decreased molecular cluster size- AND increased solubility. This is the major key to why the Imploder Water- is of benefit to most any growth thing. The molecules have more relative surface area (ready for solution)- in addition to their increase in magnetic coherent alignment. This is perfectly parallel to why the gold atom becomes super-potent to biology in the mono-atom state. Also why your blood cells are stronger (more soluble surface exposed) when they stand alone- without clumping into slimy groups in your blood.

For the SuperImploder - this all shows up in extensive individual and laboratory testing. In addition to the dramatic 20-70 percent growth results you see in still and time-lapse photos all over our web site – [www.theimploder.com](http://www.theimploder.com)- we consistently see - benefit in REDOX potential in lab measures. Redox- electron

availability to react IS the essence of FRACTALITY- namely distribution perfected- for water!

This also explains why the lab data shows dramatic reduction of things like chlorine in Imploder water. The molecules which least fit - (the chlorine molecule) are the first to be ejected. Spin density- like laminar coherence- is good for water- for the same reason centrifuges are essential for washing and industry. Perfecting compression (spin density) DOES the sorting.

This also points to why so many subjective reports from people who drink SuperImploded water that they feel energized- when they drink it- even for a short time.

Our SuperImploder is already in enthusiastic use in dozens of countries- join us on the cutting edge- adding life force to water - for life!

Directors,  
Dan Winter and Roger Green
